Getting Started

Make sure you have the following ready:

- ✓ Have a device that accesses the Internet in order to download the exercises and to watch the video content.
- ✓ Download the ***Grade 12 IT - SQL Content*** from the following link:
  https://tinyurl.com/MLE-G12IT-SQL
  This folder should contain
  - 4 x Exercise folders
  - 1 x Final Challenge folder
  - 1 x Mr Long Student Guide pdf ***<THIS DOCUMENT>***
  - 1 x Mr Long Summary pdf
  - 1 x Mr Long Exercises pdf
- ✓ If you are accessing the videos via a smart phone or tablet, we recommend you use a QR scanner to scan the QR code
  QR Scanner apps are normally freely available to download if you do not have one

Mr Long Summary ON SQL

Structured Query Language

SQL (Structured Query Language) is a special language used to manipulate and query data in a database.

Basic Structure of SELECT query

SELECT query is used to display specific data from one or tables in a database.

SELECT	*<field names to be displayed>*
FROM	*<table(s) that contain those fields>*
WHERE	*<criteria for the query>*

Personal Reflection

Using either the table below or our own table on paper, indicate which concepts you find:

- ***Confident*** (understand FULLY and able to complete related exercises)
- ***Comfortable*** (understand a bit and can complete some of the related exercises)
- ***Struggling*** (you don't understand the concept and/or cannot complete the related exercises)

Confident	Comfortable	Struggling

Suggestions

For any work you are struggling with, we recommend you re-watch the relevant videos. If you are still unsure about the content, refer to your textbook or school notes to help you and/or ask a teacher or fellow student for help.

Don't be afraid to ask for help.
