

2.6.1: What is Computing? Quiz

Question: 1

Which of the following choices lists the three main components of a computer's hardware?

✓	CPU, Memory, Motherboard
	CPU, Flash memory, Processor
	Processor, Binary, RAM
	Input devices, Output devices, Motherboard

Question: 2

What does CPU stand for?

	Computer's Processing Unit
	Computer's Plug-in Unit
✓	Central Processing Unit
	Central Pushing Unit

Question: 3

Which of the following devices is the device that connects all of the physical components of a computer together?

	CPU
	Memory
	Logic
✓	Motherboard

Question: 4

What is the purpose of an output device?

	To allow the computer to store information or programs.
	To allow the user to give data or information to the computer.
	To allow computers to connect and communicate with other computers.
✓	To allow the computer to display or communicate the result of a computation

Question: 5

What is the purpose of an input device?

	To allow the computer to store information or programs.
✓	To allow the user to give data or information to the computer.
	To allow computers to connect and communicate with other computers.
	To allow the computer to display or communicate the result of a computation

Question: 6

What is the purpose of a network device?

	To allow the computer to store information or programs.
	To allow the user to give data or information to the computer.
✓	To allow computers to connect and communicate with other computers.
	To allow the computer to display or communicate the result of a computation

Question: 7

Which of the following statements is something the operating system of a computer is responsible for doing?

✓	Managing memory allocation for all applications.
	Providing a way for the user to create text documents.
	Allowing the user to access the internet.

Allowing the user to write programs.

Question: 8

Which of the following items is an example of a user application?

- I. Browser
- II. Text editor
- III. Games
- IV. File Explorer

	II, III
	I, II
	I, II, IV
✓	I, II, III, IV

Question: 9

Which of the following choices is a brand-new application of computers, having come about in the past 5 years?

- I. Analyzing data
- II. Solving mathematical equations
- III. Making predictions about future events based on data gathered about past events

	I, II, and III
	III only
	I and III
✓	None of the answers

Question: 10

Which of the following is an application of Artificial Intelligence?

- I. Game AI's
- II. Foreign language translation
- III. Recognizing handwriting

I only
I and II
III only

✓ I, II, and III

Question: 11

Which of the following statements is the *simplest and most accurate* definition of a computer?

✓ A computer is something that performs calculations by following and executing specific instructions to solve a problem.

A computer is a machine that is able to solve any problem.

A computer is a machine that can be programmed.

A computer is something that runs applications and accesses the internet.

Question: 12

Which of the following choices correctly orders the early types of computers from earliest to most recent?

IBM Laptop, ENIAC, Analytical Engine, Abacus

ENIAC, Analytical Engine, Abacus, IBM Laptop

Analytical Engine, Abacus, IBM Laptop, ENIAC

✓ Abacus, Analytical Engine, ENIAC, IBM Laptop

Question: 13

Which part of the computer is responsible for managing memory allocation for all applications?

Word processor

✓ Operating system

Web browser

Integrated development environment

Question: 14

Which of the following could be TRUE for artificial Intelligence?

I. It's the capability of a machine to imitate intelligent human behavior

II. It can easily be used to mimic human emotions

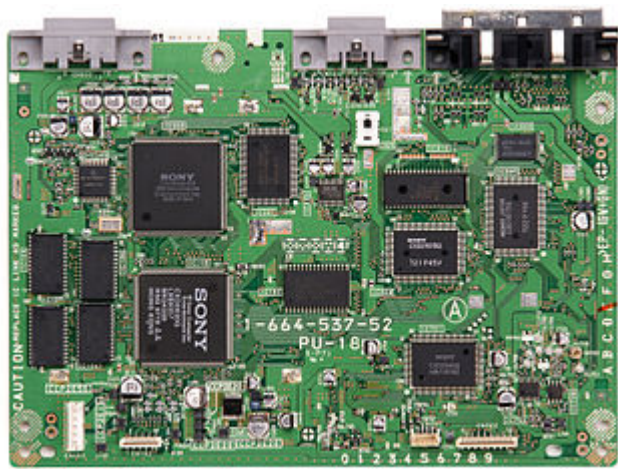

III. It's a branch of computer science dealing with the simulation of intelligent behaviors in computers

- IV. It can be easily used to detect irony or sarcasm in a story
- V. It can be easily used to read body language

	II, IV, and V
	I, II, III, IV, and V
✓	I and III
	I, II, III, and IV

Question: 15

Choose the option that correctly identifies this picture:

Source:By Evan-Amos (Own work) [Public domain], via Wikimedia Commons

✓	Motherboard
	Operating system
	Flash drive
	Central Processing Unit
