

4.2.6: Your First HTML Page

In this exercise you'll make your first fully formed HTML document from scratch!

Create a webpage with the title “My First Web Page”

The content of the page should have an `<h1>` tag that states your favorite band.

If you open your page in a new window using the “See HTML in new window” button, you should see your page title in the browser tab.

My favorite band is The Beatles

HINT: Use the previous HTML Template example as a starting point. You'll need to use the `<html>` `<head>` `<body>` and `<title>` tags, and be sure to set the DOCTYPE as well.

Solution Code

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>My First Web Page</title>
5   </head>
6
7   <body>
8     <h1>My favorite band is The Beatles</h1>
```

HTML

```
9 |      </body>
10 | </html>
```

Starter Code

No starter code.
