

4.4.2: Privacy & Security Quiz

Question: 1

A privacy policy discloses:

	How a company uses your data
	How a company shares your data
	How a company gathers your data
✓	All of the above

Question: 2

Which of the following are best practices for having a secure password?

	Creating a password that is long in length
	Creating a password that has a combination of letters, numbers, and special characters
	Using a password manager
✓	All of the above

Question: 3

By checking the box on a privacy policy page, a company can legally use your data and information in all the ways disclosed, no matter what.

	True. This is always the case.
	True. Changing your settings does not affect the privacy policy.
✓	False. It depends if the privacy policy allows you to opt in or out of sharing data.
	False. Companies do not give you the option to update your settings.
