

4.5.6: Linking an Image

Add an image to this HTML page with this URL:

<https://codehs.com/images/arches-ntnl-park>

When the image is clicked have it go to the homepage for Arches National Park, which is in Utah, US.

It can be found here: <https://www.utah.com/destinations/national-parks/arches-national-park>

Note:

- The image should be a **link** to the park URL - You'll probably have to do this using the text editor if you are using blocks.
- Click "See HTML in new window" to preview how the image and link will appear.

Solution Code

```
1  <!DOCTYPE html>
2  <html>
3      <head>
4          <title> Arches National Park</title>
5      </head>
6
7      <body>
8          <a href="https://www.utah.com/destinations/national-parks/arches-national-park">
9              
10          </a>
11      </body>
12 </html>
```

Starter Code

```
1  <!DOCTYPE html>
2  <html>
3      <head>
4          <title>Arches National Park</title>
5      </head>
6
7      <body>
8          Add the image and link here.
9
10
```

```
</body>  
</html>
```
