

4.5.7: National Parks

In the last exercise, we made one image link to another page.

Now we'll extend that a bit to have 5 images link to external pages.

Take five national parks you have heard of or visited, find photos of the park, and then link the pictures to the Wikipedia page for the park. You should have a header that says "Parks to Visit"

If you need help thinking of national parks, you can see a list of your nation's parks from this page: https://en.wikipedia.org/wiki/List_of_national_parks

HINT:

You need to make sure that the links you are linking to start with https not http. Otherwise the links won't load. This is for security reasons. URLs that start with https are secure, and links that start with http might not be secure.

BONUS CHALLENGE:

Resize all of the park images so that they are the same size

Glenveagh National Park Photo:

Solution Code

```
<!DOCTYPE html>
<html>
  <head>
```

```

4      <title>Parks to Visit</title>
5  </head>
6
7  <body>
8      <h1>Parks to Visit in Ireland</h1>
9      <a href="https://en.wikipedia.org/wiki/Wicklow_Mountains_National_Park">
10         
11     </a>
12     <a href="https://en.wikipedia.org/wiki/The_Burren">
13         
14     </a>
15     <a href="https://en.wikipedia.org/wiki/Killarney_National_Park">
16         
17     </a>
18     <a href="https://en.wikipedia.org/wiki/Glenveagh">
19         
20     </a>
21     <a href="https://en.wikipedia.org/wiki/Ballycroy_National_Park">
22         
23     </a>
24 </body>
25 </html>

```

Starter Code

```

1  <!DOCTYPE html>
2  <html>
3      <head>
4          <title>Parks to Visit</title>

```

```
5 |     </head>
6 |
7 |     <body>
8 |         Create your national parks page here!
9 |     </body>
10 | </html>
```
