

2.1.13 Culminating Activity

Description

You have completed an extensive investigation of the question *Who invented the computer?* You have gathered sufficient evidence, and the moment has come to report your findings!

Step 1: Write a one sentence summary of your conclusion to the question *Who is the inventor of the computer?*

Step 2: Choose one of the following methods as evidence to support your claim:

- **Paragraph:** In a minimum of 5 complete sentences, provide specific evidence from a variety of sources.
- **Timeline:** Create a timeline of the development of the computer. Your timeline should highlight the impact of your chosen innovator.
- **Concept Map:** Create a bubble map that visually shows the relationships between the different computer innovations. Your concept map should highlight the impact of your chosen innovator.

If you choose a timeline or a concept map, upload a picture of your diagram and include the link in this assignment. [Directions on how to upload an image are found here.](#)

default.txt

***** There is no right or wrong answer to how students approach answering the question 'Who invented the computer?' Because the computer was

Claim: [Responses will vary, sample response] It took many people to invent the computer as we know it today, so there is not one true inventor.

Evidence: [Responses will vary, sample response] It took the ideas of multiple people to make the computer what it is today. Charles Babbage and Ada Lovelace develop the idea of programming. Alan Turing developed the theory behind Computer Science. Mauchly, Eckert and the female programmers. Together, all of these people are the inventors of the computer.
