

Lesson None: Creative Credit & Copyright

https://codehs.com/lms/assignment/206644990/lesson_plan

Description	In this lesson, students will learn what copyright laws are and how to avoid copyright infringement. They will explore why copyright laws are important and how they protect the creators.		
Objective	Students will be able to: • Explain what copyright laws are and why they are important • Find images they are legally allowed to use in their projects • Accurately attribute images they find and want to use		
Activities	4.6.1 Video: Creative Credit and Copyright 4.6.2 Quiz: Creative Credit and Copyright 4.6.3 Free Response: Cite! 4.6.4 Connection: Exploring Creative Commons 4.6.5 Free Response: Respond: Creative Commons 4.6.6 Free Response: Task: Finding Images 4.6.7 Free Response: Reflection: Why is Copyright Important?		
Prior Knowledge	No prior knowledge needed.		
Planning Notes	• If possible, obtain a copy of your district/school's Acceptable Use Policies when accessing the Internet to review with the class. • Visit https://creativecommons.org/licenses/ to familiarize yourself with Creative Commons open licenses • Within this lesson, students may notice that the code editor doesn't support italics for citations. Have them denote italics by wrapping the italics word(s) in asterisks. • There is a handout that accompanies this lesson. It can be used as an in-class activity or a homework assignment. Determine how and if this handout will be used and make the appropriate number of printouts prior to the class period.		
Standards Addressed	CSTA MS Standards <table><tr><th>Name</th><th>Description</th></tr></table>	Name	Description
Name	Description		

MS-PRO-PD-14

Justify the importance of attribution and intellectual property when developing computing technologies.

CYBER ORG 6-8 Standards

Name	Description
6-8.DC.IP	Explain how intellectual property and copyright relate to fair use. Clarification statement: At this level, student discussions should focus on previous standards as well as grade-appropriate examples of the types of creative commons licensing that are available; the differences between copyright, trademark, patent, registered trademark, and other IP ownership types; and how fair use can help protect an author/creator's rights while promoting the sharing of ideas.

ISTE Standards

Name	Description
6b	Students create original works or responsibly repurpose or remix digital resources into new creations.
7a	Students use digital tools to connect with learners from a variety of backgrounds and cultures, engaging with them in ways that broaden mutual understanding and learning.

NS 6 ICT Standards

Name	Description
6.DC.b.3	demonstrate an understanding of and respect for the rights and obligations of using and sharing intellectual property, including simple citations
6.DT.a.1	be expected to search and evaluate the accuracy,

	perspective, credibility and relevance of information, media, data or other resources
6.DT.a.2	develop skills to plan and employ effective research strategies to locate information and other resources

NS 7-8 ICT Standards

Name	Description
7-8.DC.b.4	demonstrate an understanding of and model respect for the rights and obligations of using and sharing intellectual property, including simple citations
7-8.DT.a.2	critically evaluate how style, form, source, influence the accessibility, validity and meaning of information

Teaching and Learning Strategies

Lesson Opener:

- Have students brainstorm and write down answers to the discussion questions listed below. Students can work individually or in groups/pairs. Have them share their responses. [5 mins]

Activities:

- Watch the lesson video and complete the corresponding quiz. [5-7 mins]
- Complete the *Reflection: Cite* free response activity. [15 mins]
 - Explain and discuss the difference between sharing on social media versus 'sharing' in an essay or personal creation.
- Explore the *Exploring Creative Commons* connection. [10 mins]
 - Read through the different licenses.
- Complete the *Respond: Creative Commons* free response activity. [15 mins]
- Complete the *Task: Finding Images* free response activity. [15 mins]
- Complete the *Reflection: Why is Copyright Important* free response activity. [15 mins]
- Complete the *Copyright Licenses* handout. [15 mins]
 - This handout can be completed in pairs, small groups, or individually for homework.

Lesson Closer:

	Have students reflect and discuss their responses to the end of class discussion questions. [5 mins]
Discussion Questions	Beginning of Class: - List examples of creations that you know are protected by copyright laws. <i>Movies, books, music, etc are protected by copyright laws.</i> - What does it mean to be protected by copyright laws? <i>Copyright laws protect the creator so that no one else can use the work as their own. The original creator must get the credit.</i> - Suppose that you are an artist (musical, painter, etc). What rights would you want to have when it comes to other people using or showing your work? <i>Sample Response: I would want to receive credit and any associated recognition and royalties that come as a result of my creation.</i> End of Class: - Do you think copyright laws are useful? Why or why not? <i>Students may admit that copyright laws are useful but they are broken often.</i> - What is a big way in which copyright laws are still broken? <i>Movies and music are downloaded and shared illegally often. There are bootleg versions of these work which subtract from the funds that should be going to the original creators.</i> - How can you help protect other creators' rights? <i>Cite all sources to ensure that the original creator receives credit for the work. Do not download movies and/or music illegally.</i>
