

Lesson 1.7: HTML Tables

https://codehs.com/lms/assignment/127272730/lesson_plan

Description	In this lesson, students learn how to create and add tables to their web pages!
Objective	Students will be able to: • Create tables in their web pages • Explain the benefits of including tables on web pages • Compare various ways of displaying information and choose the appropriate format
Activities	4.7.1 Video: HTML Tables 4.7.2 Check for Understanding: HTML Tables Quiz 4.7.3 Example: Address Book 4.7.4 Exercise: National Sports 4.7.5 Exercise: Table of Favorites
Prior Knowledge	• HTML tags • HTML structure

Planning Notes

- Review the slides and the exercises in the lesson.
- Print out the first page or two from a website, such as [this one](#). Make copies for your students.
- If possible, provide highlighters, markers, or colored pencils.
- There is a handout that accompanies this lesson. It can be used as an in-class activity or a homework assignment. Teacher can determine how and if this handout will be used and make the appropriate number of printouts prior to the class period.

Standards Addressed

Certiport IT Specialist HTML and CSS Standards

Name	Description
1.2	Construct well-formed page markup
3.2	Construct and analyze markup that uses HTML5 semantic elements

CIW Site Development Associate Exam Standards

Name	Description
2.9	Use the most current version of Hypertext Markup Language (HTML5) to create Web pages.

Teaching and Learning Strategies

Lesson Opener:

- Have students brainstorm and write down answers to the discussion questions listed below. Students can work individually or in groups/pairs. Have them share their responses. [5 mins]

Activities:

- Watch the lesson video and complete the corresponding quiz. [7-10 mins]

- Let students play around with the *Address Book* example. The opening activity could be extended here by challenging the students to highlight the header/data/table tags by:
 - *Advanced:* adding a background color attribute - have them figure this out by looking it up.
Answer: `style="background-color:blue"` OR `bgcolor="blue"`
 - *On-Level:* drawing the table on paper and using markers. [5-10 mins]
- Complete the *National Sports* exercise. [10 mins]
- Complete the *Table of Favorites* exercise. [15 mins]
- If there is time, consider providing students the *HTML Tables* handout. Have them work in pairs to figure out the solutions, and discuss as a class. [15 mins]

Lesson Closer:

- Have students reflect and discuss their responses to the end of class discussion questions. [5 mins]

Discussion Questions

Beginning of Class:

- What are some situations where a table would be the most appropriate way to display information? What are some situations where a list would be more appropriate?
 - *A Venn Diagram could be used up at the board for students to come up and add examples for each.*
- List some websites you use that have tables. What are the tables used for?
 - *Billboard Top Songs, flight information, etc.*

End of Class:

- What is the difference between table header and table data?
 - *The table header `<th>` is bold and is the title for that column of data. The table data `<td>` is the information in each row.*
- How would you go about making a thick border around your table?
 - *The border can be added by using an attribute, `border='1'`.*

Resources/Handouts

[HTML Table Practice](#)

[HTML Table Practice \(Teacher Version\)](#)

Vocabulary

Term		Definition	
Modification: Advanced		Modification: Students Needing Additional Support	
Encourage advanced students to tackle the Bonus Challenges in the exercises or to complete supplemental activities		- Pair programming with another student - Print out video slides for students to reference	
		- Print out video slides and have students use a dictionary to translate unknown vocabulary - Pair programming with another student
