

Lesson None: Information Literacy

https://codehs.com/lms/assignment/206644981/lesson_plan

Description	In this lesson, students will learn about and discuss information literacy. Information literacy is having the ability to find information, evaluate information credibility, and use information effectively.
Objective	Students will be able to: Effectively search for and evaluate resources
Activities	4.5.1 Video: Information Literacy 4.5.2 Quiz: Information Literacy 4.5.3 Free Response: Effective Internet Searches 4.5.4 Connection: Evaluate the Source 1 4.5.5 Free Response: Respond: Evaluate the Source 1 4.5.6 Connection: Evaluate the Source 2 4.5.7 Free Response: Respond: Evaluate the Source 2 4.5.8 Connection: Hero Pig?
Prior Knowledge	No prior knowledge needed.
Planning Notes	- Review the slides and activities for the lesson before the start of class (Optional) Review this news literacy video. - Students may have developed bad habits around searching for information and evaluating sources online. Take some time to emphasize why it is important to effectively search for and evaluate resources. - There is a handout that accompanies this lesson. It can be used as an in-class activity or a homework assignment. Determine how and if this handout will be used and make the appropriate number of printouts prior to the class period.
Standards Addressed	
Teaching and Learning Strategies	Lesson Opener: Have students brainstorm and write down answers to the discussion questions listed below. Students can work individually or in groups/pairs. Have them share their responses. [5 mins]

Activities:

- Watch the lesson video and complete the corresponding quiz. [5-7 mins]
- Complete the *Effective Internet Searches* free response activity. [10 mins]
 - Pair up students after completing this activity to compare their queries and their results.
- Explore the *Evaluate the Source 1* connection and respond to the corresponding free response activity. [10 mins]
 - Question students on their knowledge of domains and their credibility:
 - .com - Commercial site.
 - .edu - Educational institution.
 - .gov - Government.
 - .org - Traditionally a non-profit organization.
 - .mil - Military.
 - .net - Network.
 - While there is no universal rule for whether a website's domain extension makes it credible, it's important to know that .com, .org, and .net domain extensions can be purchased and used by anyone.
- Explore the *Evaluate the Source 2* connection and respond to the corresponding free response activity. [10 mins]
- Explore the *Hero Pig?* connection. [5 mins]
 - Initiate a short discussion on whether the students were able to spot the hoax or not. What made it tricky?
- Complete the *Internet Scavenger Hunt* handout. [15 mins]
 - Students can work in pairs or small groups. This can also be used as a homework assignment.

Lesson Closer:

- Have students reflect and discuss their responses to the end of class discussion questions. [5 mins]

Discussion Questions

Beginning of Class:

- How would you start your research on a topic such as solar panels for your house?
 - *Answers will vary but will most likely include a google search or alternate search engine. Push students further to discuss what they would type into the search bar.*
- How can you tell if an online source is reliable? What qualities do you look for?
 - *Sample Response: Look to see if the source is recent and owned or published by a reputable company.*
- Can you give an example of an unreliable source shared on social media? How did you know it was unreliable?
 - *Answers will vary.*

End of Class:

- Name three keywords/symbols that can be used to improve a search engine query.

	◦ <i>Parenthesis can be used to find exact phrases, the ‘+’ symbol will include the word that follows in the results and the ‘-’ symbol will remove results with the word that follows.</i> • What are 5 rules or criteria that can be used to evaluate sources? ◦ <i>Evaluate the credentials of the author, find out how recent the article is, determine the sources and the domain, and decide whether the site design and writing style seem professional and trustworthy.</i> • Why is it important to evaluate sources? What are the risks if we’re not able to evaluate sources effectively? ◦ <i>The author could be biased or not honest in what he or she is presenting.</i>
