

Lesson 1.1: Introduction to HTML

https://codehs.com/lms/assignment/127272689/lesson_plan

Description	In this lesson, students will be introduced to HTML: the language for building web pages. Students will discover why HTML is important and how it works in order to start building their own web pages.
Objective	Students will be able to: • Identify the purpose and applications of HTML • Create their first simple web page
Activities	4.1.1 Video: Introduction to HTML 4.1.2 Check for Understanding: Introduction to HTML Quiz 4.1.3 Example: Our First HTML Page 4.1.4 Exercise: Say Hello!
Prior Knowledge	• No prior knowledge required
Planning Notes	• Review the slides for the lesson. • Brainstorm ways that websites have affected your life. Your students likely have not been around for the development of the Internet. How can you shed light on what has changed because of it? • Familiarize yourself with the HTML block / text editor on CodeHS. • Explore the developer tools of your browser to view the HTML code of different webpages (usually by right-clicking and choosing 'Inspect').

Name	Description
1.2	Construct well-formed page markup

Standards Addressed

CIW Site Development Associate Exam Standards

Name	Description
2.9	Use the most current version of Hypertext Markup Language (HTML5) to create Web pages.

Teaching and Learning Strategies

Lesson Opener:

- *Motivation:* Let students know that they will be creating their own publicly viewable website at the end of this unit.
- *Discovery:* Demonstrate the use of developer tools on your browser. Have students go to a favorite website and view the HTML for that website using the developer tools (right-click and choose 'Inspect'). [5 mins]
- Have students brainstorm and write down answers to the discussion questions listed below. Students can work individually or in groups/pairs. Have them share their responses. [10 mins]

Activities:

- Watch the lesson video and take the corresponding quiz. [7-10 mins]
- Let students play around with the *Our First HTML Page* example. Encourage them to use other formatting tags to discover the differences between them. Give them time to build their own creation using the different formatting tags. [10-15 mins]
- *Match My Code:* In pairs or small groups, have one student open their created example in a new window so that the corresponding HTML code cannot be seen. The other student(s) will view the page and try to recreate the page in their editor using the formatting tags. This can be done once or multiple times using different student creations. Remember that students can use the History Tab to go back to their own creation after trying to match their classmate's. [10-15 mins]

	• Complete the <i>Say Hello!</i> exercise. [5 mins] Lesson Closer: • Have students reflect and discuss their responses to the end of class discussion questions. [5 mins]
Discussion Questions	Beginning of class: • Have you heard of HTML? What is it used for? ◦ <i>Answers will vary, but the correct answer is that it is the language used to make websites.</i> • What is the last web page you visited on the Internet? What was the information you needed, or the task you needed to complete? ◦ <i>Answers will vary.</i> • What is a website you would like to build? ◦ <i>Answers will vary.</i> End of class: • How is HTML used in the real world? ◦ <i>*HTML is used to create the content for webpages. *</i> • What does the term Markup Language mean? Is HTML a markup language? ◦ <i>Markup means that it takes basic content and modifies (or ‘marks up’) the format of it.</i> • Why is it useful to learn HTML? ◦ <i>HTML is used to create webpages and webpages are useful to convey information publicly.</i>
Resources/Handouts	

Vocabulary

Term	Definition
Modification: Advanced	Modification: Students Needing Additional Support Modification: English Language Learners

- Pair programming with another student
- Print out video slides for students to reference

- Print out video slides and have students use a dictionary to translate unknown vocabulary
- Pair programming with another student
