

4.1.4: Say Hello!

When you learn a new programming language, it is tradition that the first program that you write is a “Hello World!” program.

Create a “Hello, Worldwide Web!” HTML web page!

Use a `<h1>` tag to create the heading “Hello, Worldwide Web!”

Place your `<h1>` tag inside the `<body>` tag of the HTML document.

If you are using blocks for this exercise:

- The tag can be found in the green “Formatting” section in the block toolbox.
 - You will only be able to add one block to your HTML code in this exercise. You will be able to add more later on!
-

Solution Code

```
1  <!DOCTYPE html>
2  <html>
3      <head>
4          <title>Hello World</title>
5      </head>
6
7      <body>
8          <!-- Put your h1 tag here -->
9          <h1>Hello, Worldwide Web!</h1>
10     </body>
11 </html>
```

Starter Code

```
1  <!DOCTYPE html>
2  <html>
3      <head>
4          <title>Hello World</title>
5      </head>
6
7      <body>
8          <!-- Put your h1 tag here -->
9
10     </body>
11 </html>
```
