

4.7.4: Reflection: Penetration Testing

Answer the following questions based on the video in the previous activity.

1. What is penetration testing?
 2. Why is it important to continuously conduct penetration testing for a strong security system?
-

Solution Code

```
1 | 1. What is penetration testing?  
2 |     Penetration testing is an authorized simulated attack on a computer system, performed to evaluate the secur  
3 |  
4 | 2. Why is it important to continuously conduct penetration testing for a strong security system?  
5 |     As you add new features, you can potentially create new vulnerabilities.
