

Lesson 1.8: HTML Styling

https://codehs.com/lms/assignment/127272736/lesson_plan

Description	In this lesson, students will use HTML styling to make their pages visually appealing and unique.
Objective	Students will be able to: • Understand how to apply styling to HTML tags • Apply HTML styling to make their web pages more visually appealing and unique
Activities	4.8.1 Video: HTML Styling 4.8.2 Check for Understanding: HTML Styling Quiz 4.8.3 Example: Stylish Address Book 4.8.4 Exercise: Background Colors 4.8.5 Exercise: Style Your Class List 4.8.6 Badge: Styling Badge
Prior Knowledge	• HTML tags • HTML structure • Tag attributes

Planning Notes

- Review the slides and the exercises in the lesson.
- Complete the *Design Connection* activity in advance to have your own example ready.
- There is a handout that accompanies this lesson. It can be used as an in-class activity or a homework assignment. Determine how and if this handout will be used and make the appropriate number of printouts prior to the class period.

Standards Addressed

Certiport IT Specialist HTML and CSS Standards

Name	Description
1.2	Construct well-formed page markup
2.1	Analyze and implement inline styles, internal (embedded) style sheets, and external style sheets
3.2	Construct and analyze markup that uses HTML5 semantic elements

Certiport IT Specialist HTML5 App Development Standards

Name	Description
2.3	Transform, style, and enhance text and graphics

CIW Site Development Associate Exam Standards

Name	Description
2.2	Add images and graphical formatting to HTML files, and create and edit images and audio.

2.3

Identify and use design and color principles for Web pages.

2.9

Use the most current version of Hypertext Markup Language (HTML5) to create Web pages.

Teaching and Learning Strategies

Lesson Opener:

- Have students brainstorm and write down answers to the discussion questions listed below. Students can work individually or in groups/pairs. Have them share their responses. [5 mins]
- *Design Connection:* Have students search for a poorly designed website and a well-designed website. Encourage them to only focus on the colors used. Share your findings. [10 mins]

Activities:

- Watch the lesson video and complete the corresponding quiz. [7-10 mins]
 - The handout *Keeping Track of Style* is a way for students to record all of the new styles they are learning. Consider having students fill out this handout as they watch and learn new styles.
- Let students play around with the *Stylish Address Book* example. Encourage them to change the colors and text size. See if they can “guess” some colors that are recognized as a color/style attribute. [5-10 mins]
- Complete the *Background Colors* exercise. [10 mins]
- Complete the *Style Your Class List* exercise. Feel free to adjust this exercise based on student interest to increase creativity. [15 mins]
- *Match My Code:* In pairs or small groups, have one student open their created example in a new window so that the corresponding HTML code cannot be seen. The other student(s) will view the page and try to recreate the page in their editor. This can be done once or multiple times using different student creations. Remember that students can use the History Tab to go back to their own creation after trying to match their classmate’s. [10-15 mins]

Lesson Closer:

- Have students reflect and discuss their responses to the end of class discussion questions. [5 mins]

Discussion Questions	Beginning of class: • Do most websites you visit look like the websites we have built so far? ◦ <i>Student answers will vary, but try to push them towards including color.</i> • How does the way a webpage look change how you use that web page? ◦ <i>If it is not engaging or welcoming, you may spend less time on that page.</i> End of class: • How is styling used in the real world? ◦ <i>On billboards, posters, fashion, storefronts, etc.</i> • What have you learned that will help you make your web pages unique? ◦ <i>The style attribute can change the colors and size of the page content.</i> • What are some strengths and challenges you found while applying styles to your HTML?
Resources/Handouts	Keeping Track of Style

Vocabulary

Term	Definition		
Modification: Advanced	Modification: Students Needing Additional Support	Modification: English Language Learners	
• Encourage advanced students to tackle the Bonus Challenges in the exercises or to complete supplemental activities	• Pair programming with another student • Print out video slides for students to reference	• Print out video slides and have students use a dictionary to translate unknown vocabulary • Pair programming with another student
