

Lesson None: Internet Safety

https://codehs.com/lms/assignment/206644965/lesson_plan

Description	In this lesson, students will learn to recognize online predatory behavior and strategies on how to avoid and respond to it. The Internet is a great place to socialize, but it is important to be aware of risks. Common sense and following safety guidelines can help students stay safe online.		
Objective	Students will be able to: Identify predatory behavior and how to respond to it online		
Activities	4.3.1 Video: Internet Safety 4.3.2 Quiz: Internet Safety 4.3.3 Free Response: Scenario: School Stranger 4.3.4 Free Response: Scenario: Vacation Pals 4.3.5 Free Response: Staying Safe		
Prior Knowledge	No prior knowledge needed.		
Planning Notes	- Review the slides and activities for the lesson before the start of class. - Please review supplementary materials before sharing with students—as this is a sensitive topic, certain supplementary materials may not be appropriate for your students. - Before class discussion, set some norms for being respectful to all students and creating a space where students feel safe sharing their experiences. Moderate class discussions to ensure that all students are respectful, and if needed, followup with students after class. (Optional): Review Katie's Story and decide if you would like to incorporate in your class: https://www.youtube.com/watch?v=_oGIYvlg88I - This is a shorter lesson and can be paired with the following lesson.		
Standards Addressed	CSTA MS Standards <table><tr><th>Name</th><th>Description</th></tr></table>	Name	Description
Name	Description		

MS-SYS-SE-33

Evaluate common types of cyber attacks and preventions.

CYBER ORG 6-8 Standards

Name	Description
6-8.DC.PPI.1	Discuss the risks and benefits of sharing PII. Clarification statement: At this level, student discussions should focus on previous standards as well as grade-appropriate examples of risks or benefits of sharing PII with parties such as organizations, individuals, and applications.
6-8.DC.PPI.2	Examine techniques to detect, correct, and prevent disclosure of PII. Clarification statement: At this level, student discussions should focus on previous standards as well as grade-appropriate examples of disclosure (either intentional or unintentional, and by oneself or another party) by methods such as tagging in pictures or posts, hashtag usage, or inappropriate posts

NS 6 ICT Standards

Name	Description
6.DC.b.1	cultivate and manage their digital identity and reputation and are aware of the permanence of their actions in the digital world

Teaching and Learning Strategies

Lesson Opener:

- Have students brainstorm and write down answers to the discussion questions listed below. Students can work individually or in groups/pairs. Have them share their responses. [5 mins]

Activities:

- Watch the lesson video and complete the corresponding quiz. [5-7 mins]

	• Complete the three internet safety free response activities. [15 mins] • <i>Six Click Challenge</i>: Starting from just one page, such as Facebook or Twitter, what can students find out about themselves in just six clicks? [10 mins] ◦ Determine what information students have control of (privacy policies, etc). ◦ Were students surprised about what they found? Lesson Closer: • Have students reflect and discuss their responses to the end of class discussion questions. [5 mins]
Discussion Questions	Beginning of Class: • Why should you always think twice about posting words and pictures online? ◦ <i>Your posts can last for many years. Screenshots can be made and shared even if the original post is deleted. They could be sent or seen by family members, teachers, college admissions officials, possible employers, and the police.</i> • Why should you consider creating a screenname the does not give too much information about your identity? ◦ <i>Someone may be able to find out who you are and where you live.</i> • Why should you never give out your personal information (full name, address, and phone number)? What are the possible dangers of doing so? ◦ <i>Again, someone could determine where you live or go to school using very few clues.</i> End of Class: • What can you do to prevent untrusted individuals from using a social network site to target you? ◦ <i>Choose a site that allows you to control who can see your page and make sure that you know all of your online 'friends' well.</i> • What should you do if someone sends you a message or email that asks for any information that makes you feel uncomfortable? ◦ <i>End the conversation and tell a parent or other adult.</i> • What kind of seemingly harmless 'clues' can be used to determine who you are and where you live? ◦ <i>Your birth year, school mascot, school colors, grade, bus number, etc can all be used to pinpoint your identity.</i>
