

4.2.3 Scenario: Student Ranking

Description

Consider the following scenario:

Two students in your class publish a list online that ranks all the students in your grade from most attractive to least attractive. It gets forwarded and shared across social media.

1. How could you respond to this situation? List as many responses as you can think of.
2. Of your list, what is the **best** way to respond to this situation?

Solution Code

default.txt

Two students in your class publish a list online that ranks all the students in your grade from most attractive to least attractive. It gets forwarded and shared across social media.

1. How could you respond to this situation? List as many responses as you can think of.
2. Of your list, what is the **best** way to respond to this situation?

Answers vary.
